

Meeting Agenda

Date:19/4-16

Facilitator: Jonatan G

Participants: Johan B, Robert P, Gustav G

1. Objectives (5 min). Resolve any issues preventing the team to continue.

Implement the most important UC;s without using any “real” UI.
Gustav has ordered a new laptop.

2. Reports (15 min) from previous meeting

Jonatan, Robert and Gustav did implementation of “Cursor Movement”. (First step)
DM is “finished” until we decide to add/change stuff.
RAD is unfinished, but is not lacking much.

3. Discussion items (35 min)

Robert will do neat looking Seq.Maps.
We will work this afternoon together at Chalmers & tomorrow (wednesday), meeting with CC
at thursday (working after that) and friday.
Implement an unit and the movement of it.
Jonatan will translate older meeting agendas & upload them to git.

4. Outcomes and assignments (5 min)

Robert & Jonatan will work with some doc see 3.
Everyone will work this week with code in “group” see 3.
The goal of this week is to get most of the high priority UC;s (semi) finished in the sense that
they will not work with any UI, that will be added on later (next week perhaps)
Robert will book a room for us for friday.

5. Wrap up

Meeting with CC @ thursday, showing of current project.
Next meeting friday at quarter past 9 @ M1211
